PROFESSIONAL SUMMARY

Senior AI Software Engineer with 14+ years of experience building secure event-driven enterprise-grade **microservices**, distributed systems, and production-ready multi-framework AI ecosystems. Skilled in bridging the gap between advanced AI multi-agent workflow orchestrations (**LangChain**, **LangGraph**, **RAG**), core machine learning and deep learning (**PyTorch**, **TensorFlow**, **Scikit-learn**), and scalable backend infrastructure (**Java Spring Boot**, **Python FastAPI**). Specialized in privacy-first, local full-stack AI platforms (**React**, **Node.js**) that eliminate cloud API overhead using open-source LLMs and declarative UI patterns. Proven track record of delivering business-critical software for startups and Fortune 100 companies including FedEx, Disney, and Lockheed.

TECHNICAL SKILLS

- **AI & Orchestration:** LangGraph, LangChain, Multi-Agent Workflows, RAG, Ollama, Langfuse, Prompt Engineering, Copilot, Claude, VS Code
- **Core Machine Learning:** PyTorch, TensorFlow, Scikit-learn, MobileNetV2, Text-to-SQL
- **Data Architecture:** Qdrant, ChromaDB, PostgreSQL, Oracle, Datastax Cassandra, Pydantic, Schema Validation
- **Backend Systems:** Python, FastAPI, Java, Spring Boot, Microservices, Node.js, REST APIs, JMS Asynchronous Messaging
- **Frontend & DevOps:** React, Declarative UI, JSON Schema, JavaScript/TypeScript, Tailwind CSS, Docker, CI/CD Pipelines, GitHub, GCP, Azure, Cloud Foundry, Splunk, Dynatrace

PROFESSIONAL EXPERIENCE

Advanced Systems R&D | Remote

Independent AI Engineer | June 2026 – Present

- **Architected** a local, full-stack prototype using a decoupled microservices platform, **Qdrant** RAG pipeline, and Text-to-SQL data synthesis via **PostgreSQL** deployed in **Docker**.
- **Developed** deterministic **Declarative UI** layout renderings using **React** and **Node.js** to **optimize** front-end performance and **reduce** hallucinations by using strict **JSON schema validation** contracts.
- **Eliminated** cloud API overhead costs and guaranteed 100% data privacy by deploying local, open-source **Ollama Llama 3** models.
- **Designed** stateful, resumable multi-agent workflows using **LangGraph** with human-in-the-loop validation gates.
- **Integrated** **Langfuse** deployed in **Docker** for native system observability, reducing operational workflow bottlenecks by 35%.
- **Built** an independent R&D **PyTorch** orchestration engine to execute asynchronous multi-framework machine learning tasks via **LangChain** and **Ollama (Llama 3.1 model)**.

- **Deployed Scikit-learn** for tabular analytics and **TensorFlow (MobileNetV2 workflow)** for vision inference, boosting task routing speeds by 50%.
- **Created** a self-contained, high-performance **Python FastAPI** chatbot supporting general chat and localized semantic search and vector retrieval with streaming responses via **LangChain** and **Ollama (Llama 3 model)**.
- **Reduced** document information discovery times by 40% through optimized database indexing strategies, and localized semantic search and vector retrieval.

FedEx Services | Orlando, FL

Full Stack Developer III | January 2012 – June 2026

- **Accelerated** systemic defect resolution and automated testing frameworks by integrating **AI tooling** into production support.
- **Designed** and built scalable, fault-tolerant **Java Spring Boot** microservices featuring service discovery and API gateway to execute concurrent batch processing across multiple global document repositories.
- **Engineered** a high-throughput **Java** migration utility to safely transition hundreds of millions of legacy documents into **Oracle**, **Datastax**, and **Google Cloud Storage (GCS)**.
- **Led** an agile technical team to migrate legacy document repositories to the core FedEx platform, saving **\$1M** in licensing costs.
- **Enhanced** Enterprise Document Management core web services to enable client adoption resulting in **7% revenue growth** targeting an **\$8M revenue increase**.
- **Validated Datastax** conversion models by developing a Java Spring Boot **proof-of-concept (POC)** using embedded **Cassandra** databases with **Spring JPA**.
- **Partnered** with InfoSec to implement enterprise eKMS encryption APIs and custom SSL layers, successfully achieving full **PCI compliance** for high-volume global airway bill processing.
- **Modernized** legacy applications to **REST services** architecture while introducing **CI/CD** automation pipelines and metrics dashboards.
- **Developed Google Cloud Storage (GCS)** bulk export scripts to support compliance, audit research, and legal document reporting.
- **Built** high-performance **React** and **Node.js** data visualization engines during internal innovation sprints to map real-time system metrics for leadership.
- **Honored** with four prestigious **FedEx Bravo Zulu Awards** for user interface performance improvements, and development of critical enterprise PCI compliance and authentication solutions.

ADDITIONAL ENGINEERING EXPERIENCE

Walt Disney World | Lake Buena Vista, FL

Technical Specialist

- **Developed** enterprise **Java** enhancements and data **workflows** for publish to core sales and booking composite system channels.
- **Developed** predictive **recommendation** modules to process and store high-volume scoring data generated by Revenue Management engines to drive the strategic products and services offers presented for sale on the public internet.

M2 Systems Corporation (Muscato Corporation) | Orlando, FL

Senior Software Engineer

- **Developed** multi-platform online transaction processing (OLTP) switch interfaces connecting disparate systems in healthcare and debit networks. Most notable clients included Blue Cross/Blue Shield and Sacred Heart Medical Center.
- **Collaborated** with the CEO and product team during development and customer site visits to deliver direct technical support.

TriCom, Inc. (ISR Global Telecom) | Orlando, FL

Embedded Systems Engineer

- **Served** as a **founding** Embedded Systems Engineer in a 6-employee **spin-off**, to **develop** TANDEM Clip line protocol task conversions to the Sierra Wide Area Network (SWAN) concentrator.
- **Deployed** independently to Germany to rollout production software and **execute** rigorous Acceptance Testing at the DaimlerChrysler corporate facility.

Lockheed Martin Corporation | Orlando, FL

Systems Engineer

- **Co-Op** Student Worker hired to work in Engineering due to high math.
- **Developed** simulations to analyze navigation, tracking, and fixed-point scaling algorithms.
- **Commended** for creating a ground-based FLIR/LTT turret simulation with mountain terrain and 2D/2-color imagery to evaluate hardware upgrades and air-target tracking feasibility.
- **Digitized** filters and differentials utilizing simulation block diagrams of missile subsystems including airframe and actuator dynamics, sensors and filters, and feedback control loops.
- **Performed** fly-out sensitivity **evaluation**, transfer alignment **analysis**, and filter sizing and tuning for various IMU candidates to determine navigation requirements.

CERTIFICATIONS & TRAINING

Udacity AI Tech Practitioner Training

Generative AI Fundamentals

Achieved Accomplished AI Solutions Architect Rating

GitHub Copilot Training & AI Engineering Workshops

FedEx Webinar Series

Mobile Application Development Certification

University of California, Irvine

Java Sun-Certified Programmer

Authorized Testing Center, Orlando, FL

EDUCATION

Bachelor of Science, Computer Science (Scientific Specialization), Cum Laude

Minor Business Administration

Academic Scholarship, Time-Shortened Degree

University of Central Florida, Orlando, FL
