

CHRISTI SANDERSON

Senior Full Stack Engineer | AI Engineer

Clermont, FL | christi.m.sanderson@cfl.rr.com | 321-438-4329
GitHub: github.com/christi1/resume

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 14+ years of experience designing and delivering enterprise-scale software solutions for global logistics operations. Expertise in microservices, distributed systems, cloud-native architecture, APIs, and full-stack development. Recently expanded into AI engineering through hands-on development of LLM, RAG, and agent-based applications using modern AI frameworks and cloud technologies.

TECHNICAL SKILLS

AI: VS Code, OpenAI APIs, ChatGPT, Copilot, Claude, Ollama, LangChain, LangGraph, RAG, Prompt Engineering, AI Agents, Vector Databases

Languages: Python, Java, JavaScript, SQL, CQL

Frontend: React, Node.js, NPM, Angular, HTML5, CSS3

Backend: Spring Boot, FastAPI, REST APIs, Microservices, Eureka, API Gateway, Zuul, JMS

Cloud & DevOps: GCP, Azure, Docker, Kubernetes, GitHub, Jenkins, CI/CD, Eclipse

Databases: Oracle, Datastax (Cassandra)

Security: OKTA, JWT, SSL/TLS, HTTPS, Oath2, SSO

PROFESSIONAL EXPERIENCE

FedEx Services | Senior Full Stack Developer III | 2012–2026

- Developed and enhanced full-stack enterprise applications supporting document management, security, compliance, and operational workflows across large-scale distributed event-driven environments.
- Enhanced Enterprise Document Management (EDM) services enabling ~\$8M projected revenue impact.
- Engineered one of the organization's first Enterprise Document Management microservice platforms utilizing service discovery, API gateway architecture, load balancing, and concurrent processing.
- Designed scalable REST APIs and backend services improving maintainability, reliability, and deployment flexibility.
- Automated retention-policy processing and document-management workflows, reducing manual effort and improving operational efficiency.
- Led modernization initiatives migrating legacy applications to microservice-based and cloud-ready architectures. The IBM-to-EDM migration delivered \$1M cost savings.
- Implemented CI/CD automation and engineering best practices that accelerated software delivery and improved release quality.

AI PROJECTS

General and RAG-based Research Assistant – Built a full-stack RAG-based chatbot using Ollama LLM, LangChain, FastAPI, and vector search to answer questions from technical documentation. The system enables users to choose general chat, or the option to upload documents (PDF/TXT), ask questions about them, and receive AI-generated answers based on the document content using local LLMs and vector similarity search.

Multi-Agent Research Approval Assistant – Developed a full-stack LangGraph-based AI agents system capable of research, human-in-the-loop approval checkpoints, workflow orchestration with resumable workflows, and streaming API support.

EDUCATION

University of Central Florida

Bachelor of Science, Computer Science, Scientific Specialization, Cum Laude

Academic Minor, Business

Time-Shortened Degree

Udacity Tech Practitioner Training, Generative AI Fundamentals

Skills Assessment Score: 234/300 (Accomplished AI Solutions Architect)

CERTIFICATIONS

University of California, Irvine

Mobile Application Development
